**Second City of Cerritos LED lighting demonstration planned
May 25, 2018 through June 15, 2018**

The City of Cerritos will make a second street lighting demonstration available in the residential tract south of Artesia Boulevard and west of Bloomfield Avenue Friday, May 25, 2018 through Friday, June 15, 2018. The lighting will be displayed on Felson Street, Niagara Avenue, Sybrandy Avenue and Yosemite Street. These streets were selected because they have mature parkway pine trees and they are within the same residential tract, which will allow residents to easily compare the different lighting options. The community is invited to view the display and vote on a preferred lighting option to replace current residential streetlights throughout the City.

The City is exploring replacing High Pressure Sodium Vapor (HPSV) streetlights that currently exist in all residential tracts and arterial streets with newer Light Emitting Diode (LED) technology. The options available vary in color temperature and light levels. Conversion to the new LED

technology will result in a savings to the City due to reduced energy usage. The majority of the costs to convert the streetlights will be covered by Southern California Edison through an incentive program offered by the California Public Utilities Commission.

The public will be able to submit votes at City Hall by completing a form and placing it in a suggestion box. Voting can also be completed through an online survey that will be made available on the City's website at cerritos.us.

Upon conclusion of the public input period, the findings will be presented to the City Council for further direction.
