

SAVE 5%

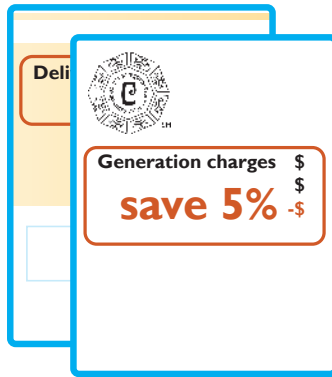

on part of your home electricity bill with **CEU** CERRITOS ELECTRIC UTILITY

Cerritos Electric Utility (CEU)

The City of Cerritos is pleased to offer Cerritos residents the opportunity to lower their electricity costs by signing up with the Cerritos Electric Utility (CEU). CEU is operated and managed by the City of Cerritos. CEU will begin providing power to residential customers **beginning summer 2021**.

There are two sets of charges on your current electricity bill: **delivery charges** and **generation charges**.

Switching from SCE to CEU will keep the same charges, but **generation charges** will be **discounted 5%**.

No new electrical setup is required, and switching from SCE to CEU for generation charges is **free** for Cerritos residents.

How It Works

CEU produces electricity and provides it to customers at a discounted rate. There will be **no charge** to residents to switch their electricity service from Southern California Edison (SCE) to CEU. SCE will continue to be responsible for **delivering** electricity to CEU customers' homes, and CEU will be responsible for **generating** electricity at a **5% discount** to customers. Due to limited generating capacity, the City will be offering the service based on priority of criteria such as age and income.

More information is coming soon. To be placed on an interest list, please send your contact information to power@cerritos.us.
